ABOUT ME

I am Full Stack Web Development aspirant with handy knowledge in *HTML, CSS & JavaScript*. I am eager to learn more concepts in my concerned skills for getting a deep knowledge and to have a hands-on experience of my skills through performing more projects and work experience.

Coding and developing new and better Software/Websites/Applications is my desire or the passion that drives me to learn new things, grow and be better every day.

I am also eager and interested in Advanced topics like Machine Learning, Data Science, App Development. I am currently started learning basic concepts in Machine Learning.

I have adequate experience in using *tools like Visual Studio Code, Anaconda Python Distribution, Google Collab, Android Studio IDE, and* an occasional experience in *PyCharm*.

MY PROJECTS

(Project Creator) Browser Interface AIO – Personalized group website with voice search feature implemented using a *JavaScript toolkit*. This URL has a *Home, About, Terms &conditions page.*

Budget Management interface – *A webapp with different features/tools provided for Calculating and estimating budget with many built-in features (Currently working on this project).*

Portfolio Website – *A website for community founded by me along with my colleagues for providing education to others and performing projects on different to explore and understand those topics properly (Currently this project is in deployment stage).*

Video Chat webapp using Django and WebRTC – *A webapp for video chatting as well as messaging in groups implemented using different frameworks like WebSocket, WebRTC, Django, etc.* **(Internship Project).**
